MAMMUT WORLD

About Mammut World

Mammut World Company started its industrial activity in 1991 and now with more than 30 years of experience and also more than 5,000 professional personnel is working. From the very beginning, the mission of the owners of the collection, by choosing the slogan "Experience the best", was to provide the best, most creative and most up-to-date possible solutions to the country's challenges and produce distinctive products such as the high quality semi-trailers, the most durable sandwich panels, portable cabins, containers and isolated rooms.

Trailer

Mammut World Semi-Trailers are included:

- Flatbed Semi-Trailer
- Refrigerated Semi-Trailer
- Tanker Semi-Trailer
- Tipper Semi-Trailer
- Curtain Side Semi-Trailer
- Tanker Carrier Semi-Trailer
- Container Carrier Semi-Trailer

Trailer

Types of Mammut World Semi-Trailers

One of the basic requirements of industrial and economic development in any country is the field of logistics and transportation infrastructure. For the first time in the seventies, the Mammut World replaced the road transport semi-trailers that were made by non-standard methods with the latest technology in the world. Mammut World, as the first producer of standard trailers in the country with a production capacity of more than 50 trailers per day, produced high quality products with new technology and sent them to the market. These semi-trailers, which are updated with the use of axles, brake system, valves and other accessories, in addition to reducing fuel consumption and vehicle and road depreciation, bring high safety for road traffic.

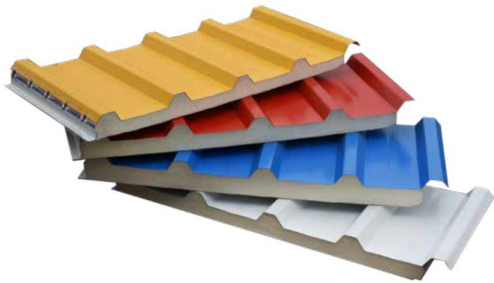

Sandwich Panel

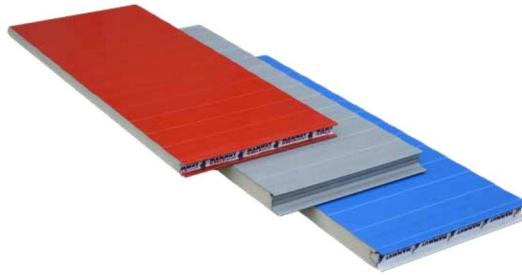

Roof Sandwich Panel

Roof sandwich panels are used to cover the roof of industrial halls, agricultural halls, warehouses, factories and so on. We manufacture roof sandwich panels with a trapezoidal shadowline design on the outer sheet surface. Also, this company is the only manufacturer of Roof sandwich panels with the ability to produce left and right overlaps.

Wall Sandwich Panel

Wall sandwich panel is a type of building materials that consists of two layers of sheets and injected foam between them, and is used to cover the wall and facade. One of the unique features of our wall sandwich panels is their simple and quick assembly. We provide a variety of wall sandwich panels that include flat, lined (grooved) and secret fix.

Sandwich Panel

Mammut World Sandwich Panels

As the first field of activity, Mammut World started to produce sandwich panels, which for reasons such as lightness, insulation and ease of installation, was the best alternative to using traditional materials, and thus opened a new vision to the world of industrial construction.

Our experts have localized the production of various types of sandwich panels by using innovative chemical technology in the production of sandwich panels. Mammut World, with the establishment of Mehrsa Shimi Knowledge-Based Company and relying on local knowledge and domestic capacities, produced the raw materials needed by this industry, which is a great leap in this field.

Mammut World sandwich panels are used to cover the Roof and wall of industrial halls, factories, production halls, warehouses, prefabricated buildings, portable cabins, cold storages, clean rooms, camps, temporary accommodation and etc.

Mammut World Company, by means of latest continuous and automatic machines with an average capacity of 6,500,000 square meters per year is currently active as local market leader which not only have succeeded to meet the needs of the domestic market and national projects, but also had noticeable experiences in the Middle East.

Sandwich Panel

Villa House

For many logical reasons, nowadays prefabricated villa houses are very popular in the world, and it has created a great position in this field in attracting tasteful people and encouraging them to buy and use this system.

Mammut World prefabricated and modular buildings are designed based on the needs of the application, climatic conditions and in

Sandwich Panel

Warehouses

Mammut World Company has the ability to produce sandwich panels for warehouses with the ability to be sterilized and completely hygienic with both side flat type wall panels to prevent the growth of bacteria. Also, it can cover structures with different uses, including: gyms, shops, repair shops, halls, factories and industrial workshops, aircraft hangars, poultry and livestock farms, parking lots and etc.

Cold Storage Sandwich Panel

Employing up-to-date facilities in Mammut World, we are able to produce all types of fiber glass refrigerator doors by producing special sandwich panels for cold storages and with remarkable technical specifications.

Isolation Rooms

Types of refrigerator rooms

Types of cargo rooms

Isolation Rooms

Isolated Rooms

In the field of intra-city transportation, Mammut World isolated rooms with various uses are installed on a variety of vans and heavy trucks. Many companies for the distribution of dairy products, meat products, proteins, pharmaceuticals, cosmetics and etc. use these isolated rooms. Thus, the diverse products of the Mammut World in the field of urban and suburban transportation have made it possible for the various goods needed by the household to reach the consumers with the desired quality by observing the world logistics standards of the day.

Conex

Guard Portable Cabin

Based on the expected efficiency as well as the number of personnel who have to take control, Mammut World portable cabins are produced in different dimensions. Security portable cabins must have special features so that the security team can do its job well. At Mammut World design, we always try to observe and improve these features in different designs.

Cold Storage Portable Cabin

Our cold storage portable cabins have many different uses and are used to store protein foods or for environmental storage and laboratory activities. The Mammut World, by using unique, proprietary technology and high-quality sandwich panels, has been able to revolutionize the refrigeration industry and have brilliant resumes in many related large-scale projects.

Conex

Portable Cabins

Designing and constructing various types of portable cabins is the next field of activity in our industrial world. The portable cabins which are produced in Mammut World, have a very high variety with the use of the best raw materials, specialized personnel and advanced production equipment; from simple and economical buildings for temporary housing to modern and luxurious prefabricated structures that are used for permanent housing.

Excavation Portable Cabins

Excavation portable cabin, is one of the special products of Mammut World, which goes through a very different production process due to the need to comply with special standards and achieve the highest quality. Then, in order to manufacture and supply the required raw materials, detailed production plans and required technical documents are prepared, compiled and subsequently sent to the planning and production units.

Workshop Portable Cabin

In each construction workshop, there are usually several workshop cabins with different uses, some of which are used for workers' rest rooms, engineers' offices, and some for services. Usually, before starting work in a construction or demolition workshop, cabins that are also cost-effective are prepared. Depending on the progress of the project and the addition of work crews, more of these types of cabins may be purchased and deployed at the project site.

Conex

On-site Portable Cabins

These types of cabins are made of steel frame and prefabricated walls made of Mammut World's sandwich panels, which are optimally packaged and assembled at the desired location. This feature makes it possible to transport the portable cabins in large numbers and at the lowest possible cost. This product is currently used in many construction sites, villages, accident areas and etc.

Telecommunications Portable Cabin

Mammut World is proud to produce this product with executive technical approval according to the American ANSI standard and approval of Iran Telecommunication Company and is known as the most reliable manufacturer and business partner of reputable companies providing telecommunication services in this industry.

Conex

Restroom and Bathroom Portable Cabin

Today, the use of restroom or bathroom cabins in the public thoroughfares of cities, checkpoints on out of town, temporary accommodation camps, workshop camps, etc. has found a special place.

Centers such as the United Nations, charities, the Red Cross, the Red Crescent, the refugee camp, crisis headquarters, many industrial companies, oil and petrochemical companies and etc. are valuable customers of Mammutworld. Due to the fact that the structures generated by Mammutworld are produced by using sandwich panels and the best materials, these types of structures are usually used in industry and have a very high durability.

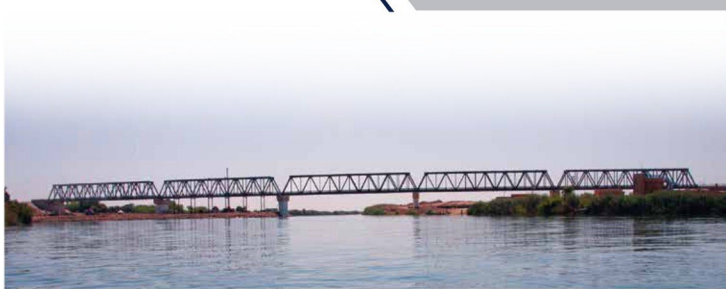

Turnpike Portable Cabin

Turnpike portable cabin is a type of cabin with security use that is used to control and collect tolls on freeways. The customers of Turnpike cabin are mostly government agencies and private companies in the field of road and tunnel construction. Due to the fact that turnpike cabins are located on roads and in harsh environmental conditions, and also to maintain the health of personnel, the need to keep the temperature of the indoor environment and the penetration of heat or cold in them are very important. Mammutworld designs and manufactures its portable cabins in such a way that while having a long life and maintaining good quality; it provides long-term security and comfort for the people living in it.

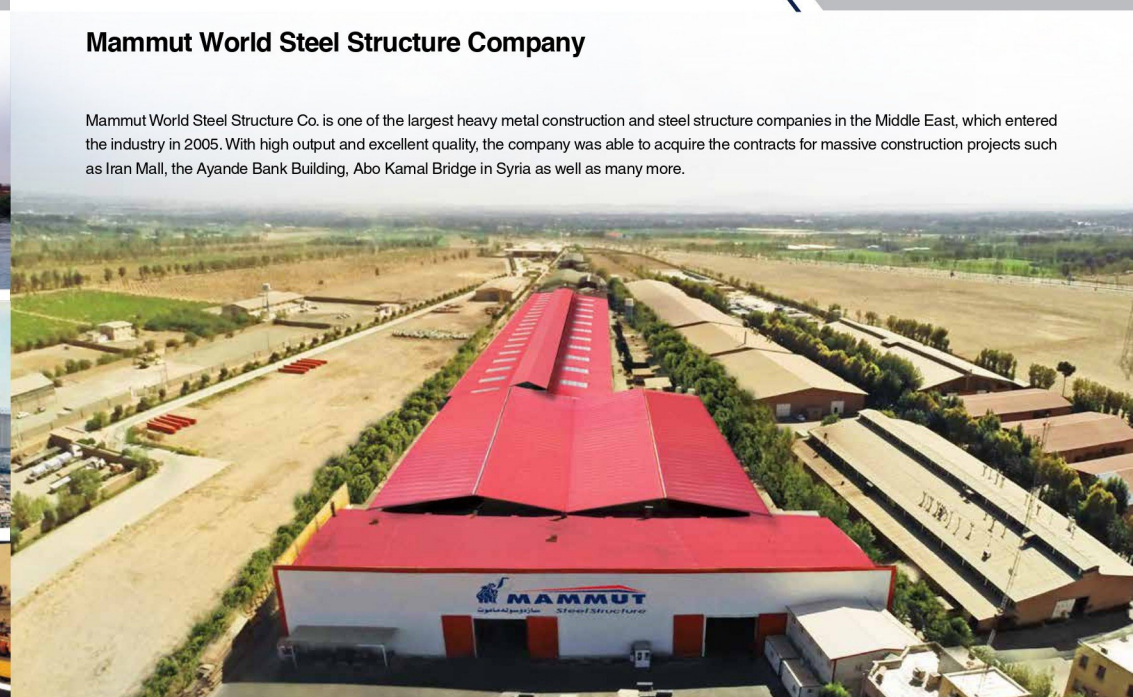

Mammut Construction

Mammut Construction

Mammut World Steel Structure Company

Mammut World Steel Structure Co. is one of the largest heavy metal construction and steel structure companies in the Middle East, which entered the industry in 2005. With high output and excellent quality, the company was able to acquire the contracts for massive construction projects such as Iran Mall, the Ayande Bank Building, Abo Kamal Bridge in Syria as well as many more.

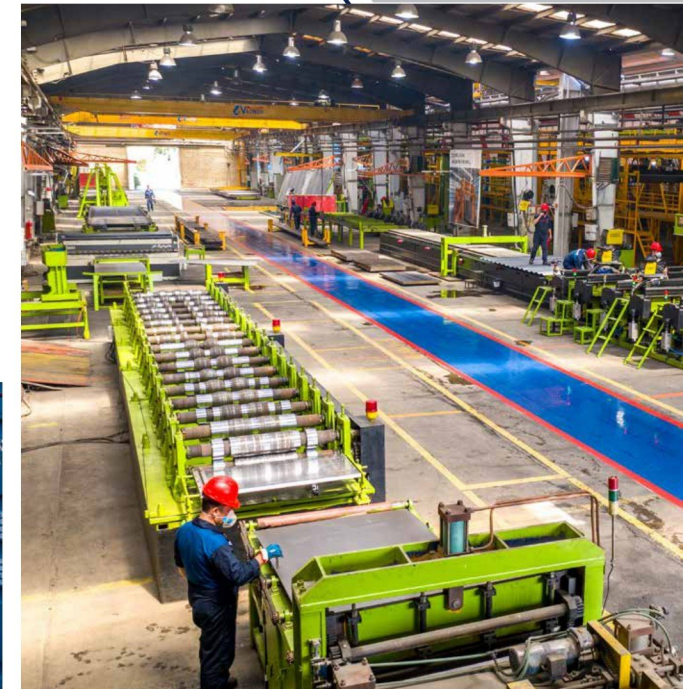

- Container Cargo 40 feet
- Container Cargo 20 feet

Types of Containers

After completing the chain of services in the field of construction and road transport, Mammut World took another big step to meet the needs of the maritime transport industry, and with the production of sea containers in various dimensions, it is known as the only container manufacturer with international standards in the Middle East region, whose production containers can be loaded on ships of world-renowned shipping lines and travel in international seas.

Vazneh Company

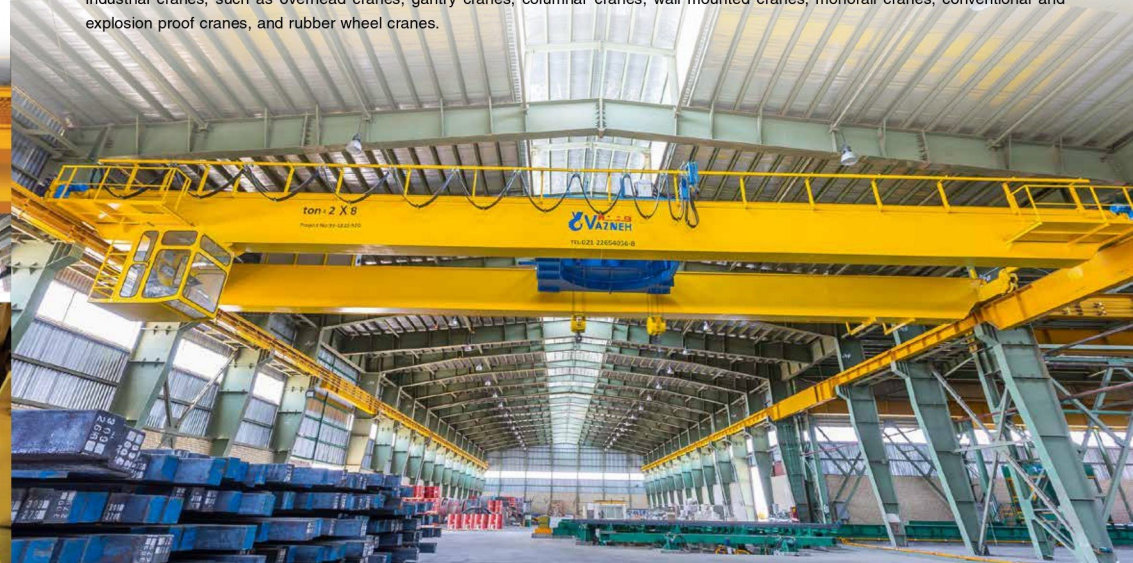

The company has expanded its production activities to 400 crane units per year, with getting the representation of STREET Co. of the UK in providing all types of conventional cranes and cooperating with STAHL Co. of Germany in the field of explosion proof cranes. In addition, Mammut Vazneh also supplies spare parts for cranes from the brands KONE-CRANES and DEMAG.

Vazneh Company

Vazneh Company

With over 54 years of experience and reputation in various industries in the country, Vazneh Company is the leading company in the crane industry in Iran, using the latest technology and gadgets in the world and high level of ability of its technical staff. Products of Vazneh are in accordance with the international standards for the construction of cranes (DIN and FEM). Vazneh supplies and manufactures high-quality industrial cranes, such as overhead cranes, gantry cranes, columnar cranes, wall mounted cranes, monorail cranes, conventional and explosion proof cranes, and rubber wheel cranes.

Mehrsa Chemistry

Mehrsa Chemistry

Mehrsa Chemistry

Mammut World, using innovative chemical technology, localized the production of sandwich panels. With the establishment of Mehrsa Chemistry Knowledge-Based Company and relying on local knowledge and domestic capacities, this company produced the raw materials needed by this industry, which is a great leap in this field.
